It is a very, I mena VERY complex game. I can only recommend it for people that LOVE puzzule games, and are REALLY good at them. Honestly this is the only game that I would say that you have to be prepared to want your money back. It can very easily confuse you to a point in which you can't do anything. If yu buy it, be prepared to want a refund very early in the game. So sadly I can't really recommend this game.. *TLDR: Not really a TLDR but if all you want to know is if this game is for you, watch the video that MartyrA2J made/posted in his review and all you need to see is at least the first 3-5 minutes to see if this is a game that will interest you. I don't generally write reviews but I do pay attention to them and I am shocked that this is only 63% positive (at the time of writing this) and realized that it was the lack of reviews with only 2 bad ones (I feel like one of those isn't fair as I've never experienced any lag at with Ultra Max graphic settings and I don't have an issue with the load times). I'm writing this to try to get this game out of the "mixed" and into the "positive" catagory. I saw this game when it was on sale and it looked very interesting so I bought it and it is easily worth the full 7 bucks. I am really enjoying the Sensory Experience (which this game has won an achievement for). The music is awesome, the fact that everything interacts with the music is amazing!! More to come as I spend more time in the game which I plan to do over the next couple weeks.. sorry but it kept crashing on my pc and it's realy frustrating but good game like graphis. Pretty interesting puzzler. Good visuals and fun to play stoned.. This game seemed interesting at first, but quickly became confusing. The puzzles were hard, but not because they were

difficult puzzles, just poorly made ones.. This game is really awesome! The concept is pretty neat, and I love how well the art, style, and narration matches it.. The game looks really laggy, and the loading screens are really slow! I know this game is made by a indie. But remember developer! There are some gamers who don't have SUPER PCs..
