Storage: 2 GB available space

Sound Card: any

English, French, Italian, German, Arabic, Bulgarian, Hungarian, Greek, Danish, Traditional Chinese, Simplified Chinese, Korean, Dutch, Norwegian, Polish, Portuguese, Romanian, Russian, Thai, Turkish, Ukrainian, Finnish, Cz

great gameplay

-AAA graphics

-AMAZING soundtrack

-the sound effect when you apply paint? INCREDIBLE!

-holy♥♥♥♥♥the color contrast is what dreams are made of: PUBG can learn from this!

-you wanna feel like Picasso 2.0? get this game. its very challenging but practice makes perfect!. I'll be honest... I found the part where internal affairs frames Menendez for working with the Mendoza family to be a bit contrived. Other than that this was a no-holds-barred non-stop action assault on the senses. I expected the violence but the nudity and gore was a bit much, though.

In all seriousness, this is a paint-by-numbers colouring game best suited for helping young children or stroke victims master/remaster fine motor control via the mouse. It comes with 44 vehicle drawings with achievements for completing each one and the mellowest of funky-beats soundtracks. In addition to having the freedom to colour however you want, there's sort of a scavenger-hunty element in trying to match the colours up perfectly with the guide image because sometimes a tiny section may be just a shade off. All that said, don't use this as a raw substitute for actual colouring/artwork for kids. It's fine, just you're developing a totally different set of skills here.

The only negative point I have are that the tip of the cursor seems to be what counts for where you drop your paint but the tip of the brush doesn't line up with it, which is a super minor issue. Another point/bug is that on one image you have to click in a bizarre spot to get the colour to apply to a rather large section; again, super minor but might have to help small children with that one.

. It's buggy! Don't bother with this one. The only game that's worth getting, if you plan on getting any of the "My Coloring Book" games would be the Food and Beverage one. This game, no matter how much you try to match the colors, won't unlock the achievements for the most part. Even if you pick the correct colors, it still won't acknowledge it as being "correct". Sometimes, the images you have to match have empty, uncolored areas when you click on the magnifying glass to compare it even though the image on the top right hand corner that you're suppose to match has it colored in. It's disappointing and frustrating!. I have a lot to say about this game. This game has helped me discover my inner artist, my inner creative genius. It opened my eyes to a world of colour and creativity, and this game has increased my IQ by 200. I have reached Nirvana playing this game, and every time I play it my powers grow ever stronger. My knowlege expands, and my brain fills with colours. This game is the epitome of extraordinary game design. This revolutionary masterpiece will shape the minds of billions, and the world will be a better place. I think that's all I can write for now, I'm ascending into the heavens... I can see Bob Ross smiling at me.... In the game My Coloring Book: Transport 44 fascinating coloring on the theme of transport (as the name implies). Looks fascinating enough. For each painted picture we get an achievement. Definitely worth the money spent - I recommend this game.. the music loop is short, its killing me

very great game my favourite actually. The game of the genre "coloring", performed in a fun children's schedule and probably done just for the children. However, it can also be played by an adult - there are easy achievements. The game itself is fascinating, you are given a certain palette of colors, and you need to colorize 44 types of transport. If a child is playing, you can learn it by the name of transport and colors
